

Future Projects in Riyadh

For nearly four decades the Riyadh Development Authority (RDA) has been working with its partners to develop **large-scale landscape and urban planning as well as open space design projects**, continually improving the cityscape and living conditions in Riyadh.

The four “Wellbeing Projects” namely Green Riyadh, King Salman Park, Sports Boulevard and Riyadh Art offer the RDA the most significant opportunity yet to improve the city’s green infrastructure while providing the agency with major planning challenges.

Bödeker Landscape Architects supports all the above projects as part of the RDA’s core team. In addition, new partners are sought for various **planning and construction management tasks**. Offices and qualified individuals in the fields of landscape planning and design are invited to send their meaningful application documents to riyadh@bp-la.com
